Registration Deadline: Wednesday May 26

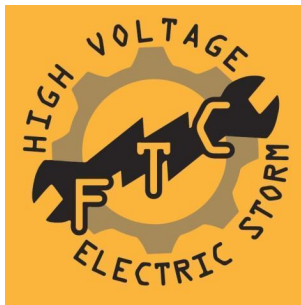

For more information, please contact:

Name: Rob Bowen

Phone: (319) 551-6623

Email: rbowen@fmtcs.com

Note: Face masks are required

Students will use the Lego Mindstorm kits to build a robot to compete in a game. They will use communication skills, problem solving, as well as exploration into the engineering process.

Open to students **currently in grades 5-8**. A small group of students, led by current High Voltage and Electric Storm members, will create a robot to participate in a competition to see who turns out on top. Spectators are encouraged to attend the competition on the last day.

If your student is participating in Basketball Camp that week, they can still attend the robotics camp and we will dismiss them early on Wednesday and Thursday.

Please return registration and waiver to either the intermediate or middle school office.

Checks can be made out to CPU Schools.
